

# SUCCESSFUL COOPERATION

Double Ju International Ltd.  
Distribution of Bartholomy Reel Handling Units

Double Ju International Ltd.

## Reel handling concepts

Movomech has together with the German partner company; Double Ju International Ltd, developed a wide range of solutions for handling reels which can be adapted to a number of various businesses and handling situations.

The various combinations for installation offer many possibilities to find a complete solution for your needs. The range of reel handling tools are designed to be experienced as reliable and solid with the highest safety norms.

The mechanical locking function is designed so that a higher load generates a better grip; this provides a safe and secure handling. Our concept product range today consists of reel handling combinations with load capacities from 30 kg up to 400 kg.

### Which solution suits you?

GW

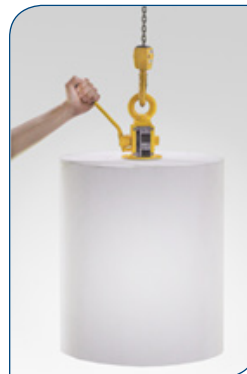

The reel handling tool **GW** has a self-turning feature

that's pivoting around the common center of gravity of the tool and reel. The tool can be installed in either our chain manipulator Mechchain Pro or in our telescoping pillar lifter Mechlift.

RH

The **RH** is a tool for handling standing reels without pivoting. A lever activates the mechanical locking function.

AL

The reel handling tool **AL** is a tool for intuitive and quick load handling. The locking of the reel alternates automatically between grip and release.

*Movomech AB offers innovative products and solutions within lifting technology and material handling, as well as distribution sales of the Movomech product range. With head office and production facilities in Kristianstad, Sweden, Movomech is a principled, self-contained enterprise in the area of lifting technology.
