

SUCCESS STORY

Tiltech

Tiltech delivers to Atlas Copco

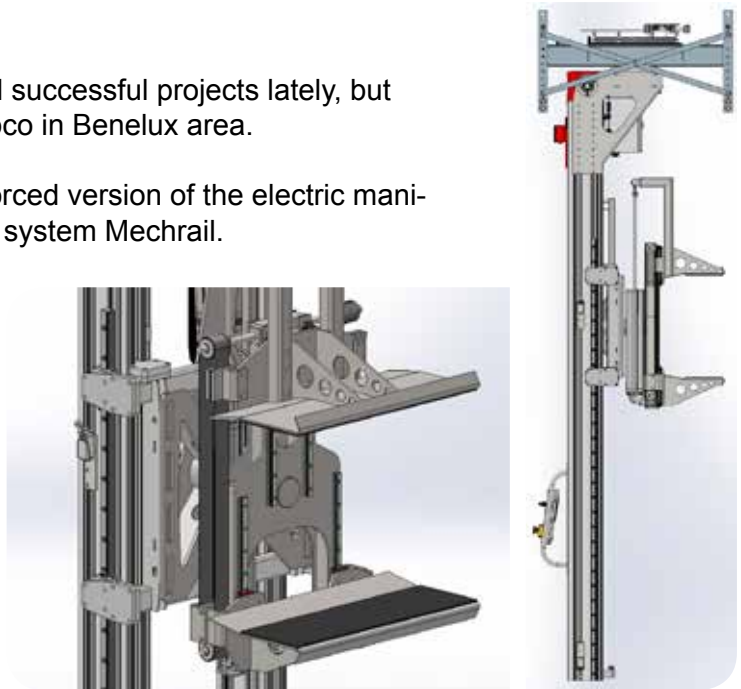

We congratulate the company Tiltech for several successful projects lately, but highlight the latest project delivered to Atlas Copco in Benelux area.

The project consists, amongst others, of a reinforced version of the electric manipulator Mechstick mounted in the aluminium rail system Mechrail.

This version of Mechstack takes a torque of 4000 Nm and 450 kg in load.

Mapping of production process with layout, design and manufacturing of customized end effector was executed by Tiltech.

The Technical Dept. of Movomech took a glance at the final layout, without any remarks of course...

With a world-leading business in more than 180 countries, Atlas Copco are a truly global company. They serve customers with innovative compressors, vacuum solutions and air treatment systems, construction and mining equipment, power tools and assembly systems. Atlas Copco have more than 44,000 committed employees in the Group which contributes to the success of the company.

Movomech AB offers innovative products and solutions within lifting technology and material handling, as well as distribution sales of the Movomech product range. With head office and production facilities in Kristianstad, Sweden, Movomech is a principled, self-contained enterprise in the area of lifting technology. All of our products are developed and manufactured on our premises in Kristianstad.
